

**Phoenix Park Farm**  
Regenerative & Chemical Free

# Regenerative Agriculture

## 5-Day Course

Term 2, 2024

Tuesday's, 9:00am - 2:30pm

Phoenix Park Farm, Morpeth

By visiting local producers and their supporting industry partners, students will get their hands dirty learning about the how and why of regenerative agriculture. Using the skills developed, students will choose a farm enterprise and create a farm plan for the business of their dreams.

From livestock handling and advanced monitoring technologies to soil testing and business development. This course offers a broad range of experiences to suit anyone with an interest in agriculture, business, technology, biological science or the environment.

### PROGRAM

- Learn basic principles about regenerative agriculture
- Discover career opportunities within regenerative agriculture
- Develop employment and training knowledge within agriculture
- Connect with local regenerative agriculture producers
- Develop hands-on skills

### REGISTER

Students can register below or via QR Code  
This program would suit Year 10 students or students interested in agriculture
