

# EXPLORE FOOD AND FIBRE CAREERS

## WITH THE FOLLOWING FARMING THEMES

### TRADITIONAL FARMING

Large scale farming operations producing crops and or livestock using the latest technology and research to farm sustainably and efficiently.

### VERTICAL FARMING

City farming in warehouses in specially designed controlled environments. Farming upwards producing herbs, vegetables and fruit with minimum inputs and no soil.

### PERI-URBAN FARMING

Farming on the outskirts of cities producing speciality high value crops with efficient use of space and innovative farming methods.

### UNUSUAL FARMING

Producing new innovative crops like commercial hemp, lemon myrtle and saffron. Exciting emerging industries like native foods, seaweed and spice production.

### ROBOTIC FARMING

Embracing technology to farm for you. Robotic dairies, driverless tractors, virtual fencing to manage livestock. You are only limited by your imagination.

### WATER FARMING

Cultivation of fish, crabs, algae and other edible aquatic critters in controlled water environments. Typically close to marine, estuaries and bodies of fresh water.

### EDUCATION FARMING

Educate students about agriculture, or educate farmers about the latest research in agriculture. There are multiple opportunities to communicate and educate the public about agriculture.

### PROTEIN FARMING

Farming insects to produce alternative sources of protein as animal feed.

## WHERE WILL YOUR SHOES TAKE YOU?
